The placement rates are determined by dividing the total number of graduates employed in the field of study and non-graduate completers by the total number of graduate completers and non-grad completers. Graduates employed in the field of study are defined as any graduate that has 1) obtained employment in their field of study, 2) has entered the military or 3) has continued their education. Non non-graduate completers are defined as any student who left the program without a credential for employment in their field of study. Graduate completers are defined as any student the met graduation requirements and received a credential. Graduates completers are not included in the calculation if they are considered unavailable for employment as defined by COE to include: death, medical reasons, incarceration, pregnancy or refusal of employment. These disclosed placement rates reflect historical outcomes of graduate employment and should not be relied on by anyone as an implicit or explicit representation or promise of future employability for any graduate.
